# Smithfield Foods' Springfield, Massachusetts Facility Participates in North America's Largest Environmental Education Program

SPRINGFIELD, Mass. (May 22, 2019) — [Smithfield Foods, Inc.](#) is pleased to announce its Springfield, Massachusetts facility's participation in the [National Conservation Foundation \(NCF\) Envirothon's](#) 2019 Massachusetts Envirothon competition where 200 high school students competed to demonstrate their knowledge and environmental problem-solving skills.

Smithfield employees from the local community donated their time and expertise to the program, serving as volunteer advisors to lead training sessions, facilitate program curriculum, and coordinate activities.

"We work hard to educate our teachers, students, and citizens of Massachusetts about the critical issues facing our environment and the innovative ways in which we can solve these challenges," said Brita Dempsey, coordinator for Massachusetts Envirothon. "We are grateful to Smithfield for their guidance and leadership during the competition—they are wonderful role models for our students."

The 2019 Massachusetts Envirothon competition is part of the NCF-Envirothon, an environmental education program and competition that attracts more than 50,000 high school students across the U.S., Canada, and China. Participating students completed hands-on and in-class activities to demonstrate knowledge of soils and land use, aquatic ecology, forestry, wildlife, and current environmental issues.

Smithfield and its employees will continue to offer financial and volunteer support at ongoing NCF-Envirothon regional and state-level competitions taking place near the company's locations nationwide, leading into the program's finale championship this July in Raleigh, North Carolina.

"Smithfield applauds Envirothon and its participants for their ongoing efforts to positively impact the environment," said Stewart Leeth, vice president of regulatory affairs and chief sustainability officer for Smithfield Foods. "We commend this year's participants for their efforts and we look forward to seeing the innovative ideas from this next generation of leaders in environmental stewardship."

Smithfield actively supports NCF-Envirothon and its efforts to advance environmental education, aligning with both Smithfield's environmental initiatives and commitment to support the vitality of local communities. Smithfield's industry-leading sustainability program is focused on five pillars: animal care, environment, food safety and quality, helping communities, and people.

## About NCF-Envirothon

NCF-Envirothon is a hands-on, environmental problem-solving, leadership development program that includes a competition involving high school students annually throughout the U.S., Canada and China. Participating teams complete training and testing in five natural resource categories: soils/land use, aquatic ecology, forestry,

wildlife and current environmental issues. The program combines in-class curriculum and hands-on field experiences to provide an E-STEM program for students in environmental education, science, technology, engineering and mathematics. NCF-Envirothon works in partnership with local conservation districts, and their state associations, forestry associations, educators, school officials, and cooperating natural resources agencies to organize and conduct competitions on the local, regional, state and/or provincial level. Winning teams from each state and province advance to a final competition for the opportunity to compete for recognition, scholarships and prizes as well as an understanding of natural resources issues. For more information on this exciting program visit [www.envirothon.org](http://www.envirothon.org) and connect with us on [Facebook](#), [Twitter](#) and [Instagram](#).
